To the Trade

After fourteen years of successful manufacturing of Gas Heating Goods, during which time we have enlarged our factory from 2200 sq. ft. floor space to 40000 sq. ft., thus testifying to the quality and integrity of our firm. We manufacture nothing that we cannot absolutely guarantee to be satisfactory. One department is devoted exclusively to fine quality special work in brass and copper, work of such fine quality as cannot be produced in any other factory in Pennsylvania.

"Aluminum" Gas Heaters

CANNOT RUST

EASILY KEPT CLEAN

BEAUTIFUL IN APPEARANCE

LIGHT IN WEIGHT

After years of use these Heaters can be polished like new at very small cost.

Sides, top, back and front are made of special hard rolled sheet Aluminum; reflectors are made of heavy gauge polished copper; the tips are the best that money can buy, and the workmanship is of the best.

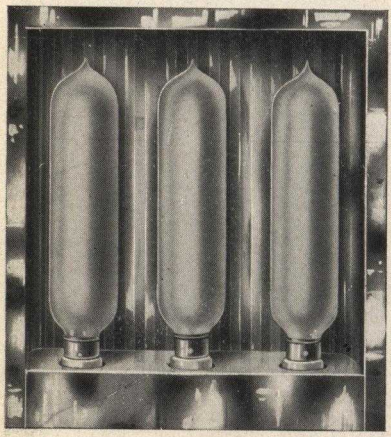
2	28 "	22 "	9 "	Oxidize	20.00

ADAMS BROS. MFG. CO.

Reflector Gas Heaters

Regarding Reflector Heaters, we would ask the trade to bear in mind that we do not build a reflector that we cannot absolutely guarantee to give satisfaction. Every one of our Reflectors is built on scientific principles. We could cheapen considerably by using lighter weight of copper, or by tacking our copper in spots instead of soldering the full length of copper seams. We could employ boys to do this work, but every stove is finished by a thorough mechanic. None of our copper reflector plates are bolted to back of stove, as we cannot get proper combustion unless the deflector plate and copper are set in the exact position, to get the circulation of air from the floor, to mix properly with the gas. This construction costs considerably more money, as it requires better mechanics, but the results are so much better from a gas-saving standpoint, as well as heating, that any dealer who values the reputation of his store, and values the gas situation, would be willing to pay the advance that these features entail.

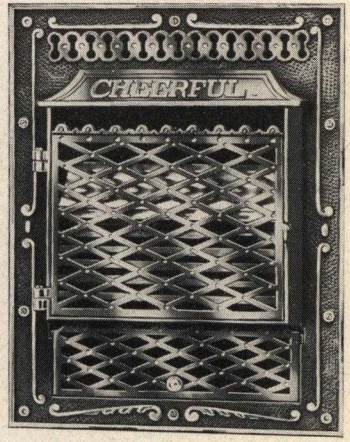
CHEERFUL ELECTRIC WALL HEATER



No.	Height	Width	Depth	Finish	List
1	14½ in.	12½ in.	4½ in.	Nickel	$31.25

There is a reason why many of these heaters are sold to those having steam and warm air heat in their homes.

CHEERFUL WALL HEATER



Height	Width	Depth	Finish	List
18 in.	14 in.	6½ in.	Nickel	$12.00
18 "	14 "	6½ "	Oxidize	12.00

This is a new idea in bathroom heating, can be inserted into the wall out of the way. Has a very neat appearance, requires no flue and is odorless.

ADAMS BROS. MFG. CO.

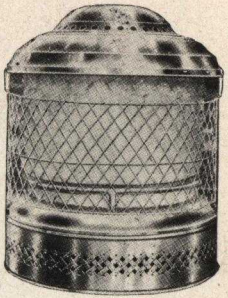
CHEERFUL ELECTRIC HEATER

No.	Height	Width	Depth	List
2	25 in.	14 in.	8¾ in.	$36.00

This Electric Heater is used in Private Houses, Steamships, and any place where Electricity is available. No smoke, dirt or odor.

ADAMS BROS. MFG. CO.

REGINA HEATER



No.	Height	Width	Depth	List
1	26 in.	21 in.	10½ in.	$23.65
2	24 "	14 "	8¾ "	17.35

Made in Polished Brass, Oxidized Copper and Nickel Plated. We guarantee these heaters to give more heat than any heater made of its size. It fits close to the wall or grate, and has a very attractive appearance.

VOLCANO HEATER No. 16

No.	Height	Width	Depth	List	
16	26 in.	23 in.	13 in.	$20.00	Closed front
15	26 "	23 "	13 "	18.00	Open front

The heated hot air comes through the top of stove instead of front panel. Makes a very attractive stove for a parlor or dining room.

Nickel Plated top, foot-rail and feet, Mica inserts in front.

ADAMS BROS. MFG. CO.

DOMINATOR HEATER

No.	Height	Width	Depth	List
17	26 in.	23 in.	13 in.	$16.00 Open front
18	26 "	23 "	13 "	18.00 Closed front

The body of this stove is the same as the No. 15 Volcano, but has a straight burner and four radiation tubes at the back.

Nickel Plated top, foot-rail and feet. Mica inserts in front.

ELITE HEATER

No.	Height	Width	Depth	List
3	26 in.	16½ in.	8 in.	$10.00
4	28 "	20 "	8 "	12.00

This stove is made of very fine quality steel, perforated radiator top. Cast front with Mica inserts. Suitable for large bedroom or dining room.

ADAMS BROS. MFG. CO.

For description see page 28

Grate Heaters

We wish to call particular attention to our Reflector and Asbestos Back Grate Heaters. We believe we have the largest variety of artistic designs. We have been building grates for a number of years, and have overcome the defects of the old style grates both in economy of gas and wasted heat. Formerly 50 per cent. of the heat was wasted from being drawn up the flue. We place an effective damper in our asbestos grates, and in our reflector grates we place a damper and deflector, also an air space, in order to throw nearly all the heat directly into the room. We are only illustrating a few of our grates, and will be glad to furnish dealers with full catalogue upon application.

ALL CHEERFUL REFLECTOR GRATES CAN BE FURNISHED WITH ELECTRIC ATTACHMENT
